SKILLS & TECHNOLOGIES

React · Next.js · JavaScript · Redux · React Native · HTML5 · CSS3 · Python · Django · Flask · PostgreSQL · WebSockets · REST APIs · UI / UX · Web Design · App Dev

SELECTED PROJECTS

NoKnot ★ Featured

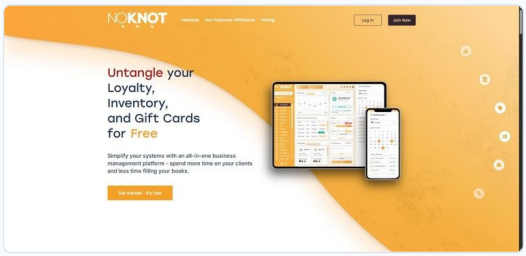

Software Development Engineer · 6 yrs · noknot.au

An all-in-one business practice management platform for service businesses. I build and maintain the front-end — developing new features, improving existing ones, and connecting the interface to back-end services.

KEY FEATURES

- Booking & scheduling calendar across team, areas, spaces and tables
- Loyalty, inventory and gift-card management
- Point-of-sale checkout with promotions & discounts
- Real-time support chat — presence, read receipts, file sharing

React · Redux · WebSockets · REST

Public homepage (dashboard under maintenance)

WTBL — Water Technology BD Limited

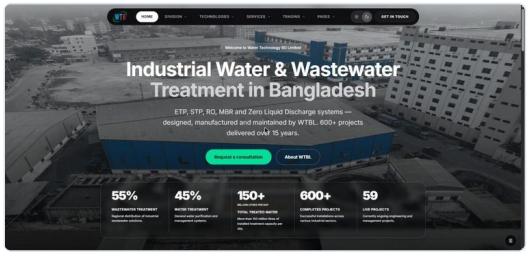

Full-Stack Developer · Freelance · wtbl.com.bd

Corporate website for an industrial water & wastewater treatment company. Built end-to-end — both the public-facing site and the back-end.

WHAT I DID

- Service, technology and completed-project pages
- Animated hero with live stats (projects, capacity)
- Light / dark theme toggle
- Full back-end integration

Django · JavaScript · PostgreSQL

Homepage

Othoba.com — E-Commerce Platform

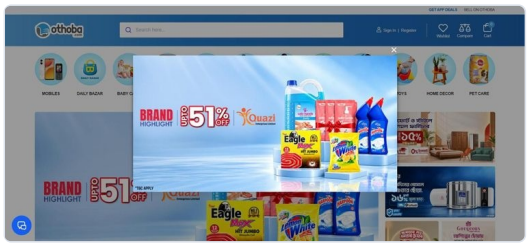

Front-End Developer · Freelance · othoba.com

A large live e-commerce platform. I owned the entire front-end implementation while a co-worker handled the back-end systems.

WHAT I DID

- Full storefront UI — layouts, components, responsive design
- Product browsing & category navigation
- Search, wishlist, compare and cart interfaces
- Promotional banners & brand-highlight sections

React · JavaScript · REST

Homepage

Abbott Fitness — Online Coaching

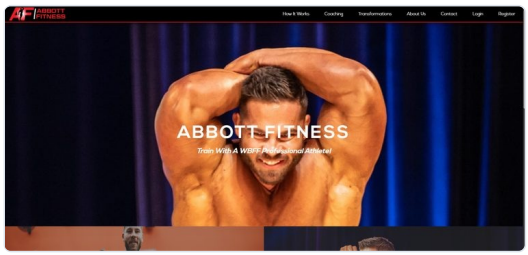

Full-Stack Developer · Freelance · abbottfitnessofficial.com

An online fitness coaching platform. I built the complete front-end design and a Django back-end, managing the full site functionality.

KEY FEATURES

- Coaching programs, transformations & how-it-works pages
- Transformations gallery pulling images from Instagram
- Login / registration & member flow
- Full front-end design + Django back-end

Django · JavaScript · Instagram API

Homepage

EduPlatform — South Point School & College

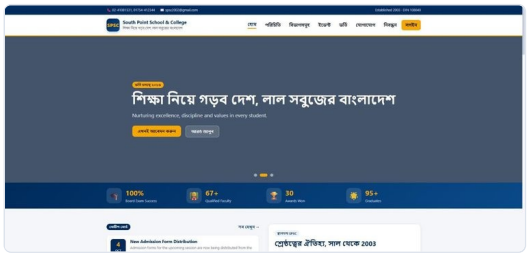

Full-Stack Developer · Personal · eduportal-sooty.vercel.app

A school website & admission portal built completely myself — front-end and back-end.

KEY FEATURES

- Admin / teacher / student portals with role-based access
- Mark approval workflow & assignment grading with PDF annotation
- WhatsApp-style group chat; notices & events
- Fully bilingual (English / বাংলা)

React · Django · PostgreSQL · i18n

Homepage (Bangla view)

Italien Specialisten — Italy Travel & Property

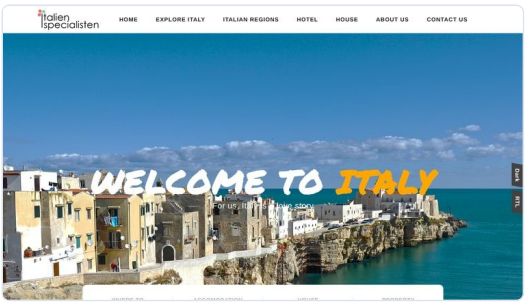

Front-End Developer · Freelance

A travel and real-estate browsing platform for Italy on a Django back-end. I handled the front-end implementation.

WHAT I DID

- Destinations, regions & locations browsing
- Hotels (B&B) and houses for rent / sale
- Dark mode & RTL layout support
- Public-facing page layouts & navigation

React · Django · Templates

Homepage

Medical Tourism Italy

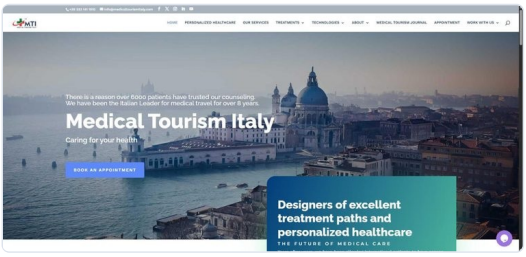

Front-End Developer · Freelance · medicaltourismitaly.com

Front-end for a medical tourism company helping international patients access personalized healthcare and treatment paths in Italy.

WHAT I DID

- Services, treatments & technologies pages
- Appointment booking interface
- Medical journal / content sections
- Responsive public-facing layouts

JavaScript · HTML5 · CSS3

Homepage

RC Report — Vehicle Registration Reports

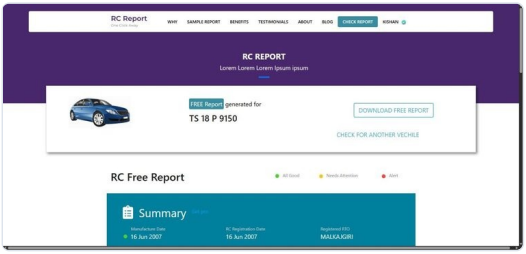

Full-Stack Developer · Freelance

A platform that generates vehicle registration certificate (RC) reports from a vehicle number, on a Django back-end. Built completely myself.

KEY FEATURES

- Instant RC report generation from a vehicle number
- Free & pro report tiers with status indicators
- Downloadable report summaries
- Full front-end + Django back-end

Django · React · REST

Free report page

Footwear Store — E-Commerce Demo

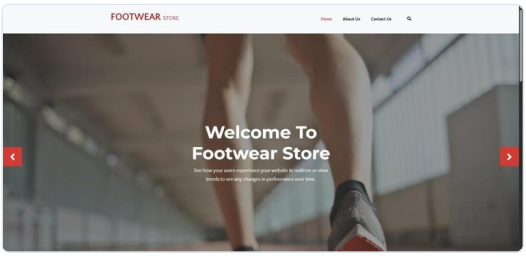

Full-Stack Developer · Freelance · live demo

An e-commerce storefront demo for a footwear brand. Built completely myself — front-end and back-end.

KEY FEATURES

- Homepage with hero slider
- Product browsing & company information pages
- Responsive storefront design
- Full front-end + back-end

Django · JavaScript · CSS3

Homepage

Source code for these projects is not included, as they were either delivered to clients who own the codebases or are part of a current employer's proprietary product. The live sites and screenshots are provided as evidence of completed, production front-end work.
